

Tips and Tricks

Did you know:

- Using Cover Care or 303 Protectant on your Jacuzzi's pillows will help them last longer?*
- The cleanest hot tubs have their ozone generators replaced every 2-3 years?*
- Filling your spa using a filter filler (part # 6540-329) will help prevent air lock?*
- Using Cover Care or 303 Protectant on your Jacuzzi's synthetic (not wood!) cabinet can help restore it's original shine?*
- Using Spa Defender or some other calcium inhibitor will help keep your motors and valves functioning properly?*
- Keeping your filters clean and replacing them regularly will not only keep your hot tub water cleaner but it will help reduce wear on your pumps?*
- Draining your Jacuzzi's water every 3-4 months is a cheap, easy way to ensure you are not damaging hot tub components or unnecessarily wasting money on extra chemicals? If you can no longer balance your Ph, it is a good idea to drain it.*
- Using Metal Gon upon fill up can prevent damaging metal and mineral deposits from forming on your hot tub's equipment?*
- Keeping your waterfall turned off when your cover is closed will help prevent premature wear on the bottom of your spa's cover?*
- Cleaning your Jacuzzi's filter(s) every 2-3 weeks (at least!) will help prolong the life of your spa's pumps?*
